

Micro Strip Connectors

If you need an ultra-miniature, rugged and affordable strip line connector, one of Cristek's Micro Strip connectors will likely suit your application. These devices use the same contact system as our M83513 and MOTS product and will perform in accordance with all applicable military specs. Wire-to-wire, board-to-board and board-to-wire versions are available with many options. Connectors can be ordered in dual and single row configurations. Surface mount and thru-hole versions are available with optional board mounting features. Most versions can be ordered with either an end or side mounted latching system that requires no tools. Guide pins and screw fasteners are also standard features. Strips are very adaptable so if you don't see the exact version you are looking for please consult the factory. Metal shell versions are also available.
