

M24308 & MOTS D-Subminiature Connectors

Cristek has recently upgraded and enhanced its offering of D-Subminiature connectors to provide you with more options to choose from. The standard density products are now available with a plastic clip option. At the time of publication Cristek was in the process of approving these economical but reliable parts to the QPL. Consult us for most current QPL status.

A complete line of High Density S-Subs is now available from Cristek. MOTS versions are immediately available and are directly interchangeable with the mil spec part numbers listed. Contact us for current status of QPL efforts.

The back of this section describes the wide variety of MOTS modified versions that are offered by Cristek.
